

A1. Nudge:

Thanks for showing up to the free live masterclass earlier guys.

Feel free to ignore this if you've already submitted your application form.

This is your nudge to do it if you haven't yet.

I hope you're all aware that the value you've just gotten fades away pretty fast.

Here's the link for it: [LINK]

A2. Case Study:

Let me tell you about my student named Sam.

He came to me when the first month of his journey fell flat.

We managed to get a channel monetized only a month later.

He earned roughly \$3,000 the following month.

The only thing standing between him and yourself is making a change.

Submit your application form here: [\[LINK\]](#)

A3. Recap:

All of you guys showed up to the free live masterclass.

Here's a reminder of the offer that I made on it for the ones in the back.

Shorts Maxxing provides you with one-on-one access, one-on-one coaching calls, group coaching calls, course content, and community.

The Niche Launchpad is one of the many bonuses included.

The only setback is remaining stuck where you are forever.

This is what you've been looking for: [LINK]

N1. Nudge:

I know that some of you guys couldn't make it to the free live masterclass.

You're lucky that I've got a replay of it though: [LINK]

I'm just saying that it's not going to be up forever.

N2. Recap:

I'm going to give you guys a quick rundown of the free live masterclass.

My way of hitting \$10,000 per month with faceless YouTube in less than 90 days using Shorts can be boiled down to two things.

Longs force you to prove yourself for a chance from the algorithm.

Shorts give you a fair shot no matter what.

I've covered absolutely everything around this throughout it.

I'm only keeping the replay up for a little longer: [\[LINK\]](#)

N3. Pressure:

I want to bring something to the surface for all of you guys.

You registered for the free live masterclass to learn my way of hitting \$10,000 per month with faceless YouTube in less than 90 days using Shorts.

This is without skills and experience, an existing foundation, or any upfront risk.

I'm only mentioning this because I'm about to take down the replay: [\[LINK\]](#)
